

Vegetable cultivation technology and marketing method for small scale farmers 2013 starts

The opening ceremony of Region-focused Training Course on Vegetable Cultivation Technology and Marketing methods for Small Scale Farmers 2013 was held in JICA Tsukuba on February 14, 2013. Mr. Hasegawa and Mr. Sawada from AAI are in-charge of this training course. Dr. Zaitzu, the director of AAI, attended this ceremony and encouraged them to complete this course effectively.

Ten participants from eight countries attend this course and stay in JICA Tsukuba. They study market-focused vegetable cultivation technology in Japan for nine months until November. This course contains lectures, field/lab practice and study tours/visits in main the training program. In addition, each participant conducts his/her own experiment called “Individual Experiment” to focus on solving problems directly related to his/her work.

All AAI members contribute actively to their achievement in this course and we hope they all love Japan.
