

Mr. Nakayama participated in a workshop on “Valorization of Scientific Research Achievements in Water Sector” held at Tunis, Tunisia on March 17 and 18, 2015. The aim of the workshop was to share the achievement of activities in the water sector in Tunisia. The workshop consisted of 4 sections, “water as a resource”, “drinking water”, “waste water”, and “water and irrigation.” Mr. Nakayama was invited as an expert of irrigation and gave a lecture on agriculture in Syria and activities of JICA-DEITEX (Development of Efficient Irrigation Techniques and Extension) project.

Mr. Nakayama talked about "extension tools for disseminating water saving irrigation techniques in the Syrian Arab Republic" in Panel 4: Water in irrigation at the workshop.

Participants actively exchanged their views and opinions

Five Japanese lecturers introduced the latest findings and technologies of Japan (right: Mr. Nakayama).

The workshop was held at the Hotel Ramada Plaza Gammarth, Tunis.

Minister of Agriculture, Water Resources and Fisheries delivered the opening address.
