

Knowledge Co-Creation Program (Group and Region Focus)
 “Vegetable Production Technology for Livelihood Improvement of Small Scale Farmers”

On February 28, 2020, the opening ceremony of the second year of “Knowledge Co-Creation Program on Vegetable Production Technology for Livelihood Improvement of Small Scale Farmers” was held at JICA Tsukuba. Eight members from eight countries are participating in this program this year.

Although it is only a few days after their arrival in Japan, three female and five male participants are mutually understanding with good teamwork. The duration of this program is 7 months, slightly longer than the last year, but the tight schedule remains the same. The hard days will be continued starting from the preparation of inception report to various activities such as common and individual experiments with action plan formulation. We will work hard to encourage each other and sometimes compete to complete the program until September. Health First for now!

	CAMBODIA	Ms. CHAN <u>Phirun</u>		LAOS	Ms. NAMBOUNMY <u>Nattana</u>
	INDIA	Mr. Ashok Kumar (<u>Shoki</u>)		NEPAL	Mr. KC Ganesh Kumar
